In terms of the 2 amounts in POLREP # 5, the original estimate was in the preliminary information, which is carried from POLREP to POLREP... normally, OSCs do not change that information... the current information, which included the change in amount was in the operations (current) section...

Be sure and check all POLREPs for consistency with the press releases. Thanks. Having trouble reading this one due to lack of some reader on my computer. Guess it is the new system. Check POLREP number 5, it has too separate statements of the spill volume.
